SignPuddle Software 1.5

<http://www.signbank.org/signpuddle>

March, 2007 was the first posting of SignPuddle 1.5 on the web, replacing the old SignPuddle 1.0. This was a huge accomplishment. SignPuddle 1.5 is an entire new and improved generation of SignPuddle software and servers. The first sales of the adorable PocketPuddle were received in April 2007. This ingenious software, by Steve Slevinski, makes it possible to write signs, dictionaries and documents in SignWriting, on the web or on a tiny USB stick, which you can place in your pocket!

The PocketPuddle™

The PocketPuddle made its debut at the CUNY Conference held in La Jolla, California, March, 30-April 1st, 2007. There was no internet connection at the conference, so the PocketPuddle made it possible to demonstrate SignPuddle Software without connecting to the internet!
